

Please do not approve this docket. Approving this will only create less competition from those without the backing of large corporations or wealthy private companies.

The public can choose what is professional and newsworthy right now without our government intervening in the natural business process.

The choice should be the public's to make between what is available - freely. If you pass this docket, then the public will be given a choice of what you decide is appropriate based on the size of the company.

We do not need a "nanny-state" government.

Thank you.
